PROJECTS

E CART A ECOFRIENDLY E COMMERCE WEBSITE

 E-Cart will focus on selling **eco-friendly, biodegradable, and sustainable products**, including **organic clothing, reusable household items, solar gadgets, and zero-waste essentials**.The platform will emphasize **plastic-free packaging, carbon-neutral shipping, and eco-friendly supply chains** to minimize environmental impact. You can also offer **eco-points or rewards** for sustainable shopping habits. E-Cart can include a **blog, sustainability tips, and partnerships with green brands** to educate users about environmental responsibility.

ONLINE BOOK STORE A E COMMERCE WEBSITE

Developed dynamic e-commerce websites with HTML, CSS, and JavaScript used for frontend .Django ,sql used for backend my platform will allow users to **buy** or **borrow** books online, offering both **eBooks** and **audiobooks**. Users can purchase books permanently to access a collection of books. Users can **read books online** using an in-built reader with features like **bookmarking, highlighting, adjustable fonts, and dark mode**. They can also **download books** for offline reading.Customers The website will include **user reviews and ratings** to help users find books they love. There could also be **book clubs, discussion forums, or author interactions** to enhance engagement.
